

Tablet NoteTaker

Converts PCs and Notebooks into TabletPC compatible computers!

Enables the use of digital ink features and utilities in Windows VISTA™ and Office® 2007

Key Features

- Users can write on plain paper with a cordless, standard-size pen and simultaneously creating a digital copy of anything they write - without using a digitizing surface
- Turns every PC into a Tablet-PC compatible
- Enables use of digital ink applications and utilities available with Windows Vista™ and Microsoft Office® 2007 applications, including Vista Journal and OneNote
- Full mouse capabilities

Tablet NoteTaker

Pegasus' New Digital Pen/Mouse works with Windows Vista™ and Office® 2007

Product Description

The Tablet NoteTaker turns PCs and laptops which work with Windows Vista™ to tablet PC compatible computers.

Tablet NoteTaker enables users to switch between "Writing-on-Paper-Mode" by using the Tablet NoteTaker as regular ink ball-pen, and "Pen-Tablet-Mode", utilizing the pen's hovering and mouse button functionality to write directly into Windows Vista™ and Office® applications.

Tablet NoteTaker enables the user to:

- E-mail sketches or handwritten notes/memos in any language
- Insert sketches, signatures, equations and notes into WORD® documents
- Annotate, add comments, edit and draw in your own handwriting onto Microsoft Office system documents
- Store and retrieve handwritten notes, drawings and sketches according to file name, date or any other criteria

Potential Users

Presenters, consultants, designers, engineers, students, teachers, salesmen, technicians, Windows Vista™ and Office® 2007 users.
